

## **CSC Task Force Meeting 10/3/2023      Notes**

**Attending:** Nancy, Leah, Carol, and Tara. Eli Arnow was present at the beginning.

**Community Solar:** Solstice meet, greet and sign up at Lake Taghkanic on October 8 from 1 -3pm at the Pavilion. Eli and CAC will lead a short hike starting at noon. There will be a CAC table with information and maps.

**Heat Smart Campaign Update:** Carol just got the last contractor's name so can submit and get the grant dollars per scoping document. HEAP lists are confidential so can't do outreach to them and they are likely receiving the information when learning of their benefits.

**County Climate Smart Task Force** – there should be a town rep from Gallatin on this committee. There are virtual meetings monthly. Carol or Tara will be the rep and we will let the Town know.

**CARP** – Carol and Terry Porter attended the in person workshop at CGCC. The survey results for Gallatin are great – four pages – she will have at the table on October 8. It is good data that shows our residents' concern for the environment.

**Comprehensive Plan Maps** – Get the maps from Larry Brody and ask Lisa to post to the Town website. Carol will get them printed for the **10/8 event**.

**EV Scoping Document** – The group worked to draft. Leah will check with Kinderhook Toyota if there is any way to track EV buyers from Gallatin. Others will check other dealers.

**Next meeting:** November 14, 5:30 at Town Hall.
