

**Attending:** Pat, Nancy, Leah, Carol, Tara and Tim.

**Heat Smart Campaign Update:** The number of heat pumps installed per the scoping document has been reached but Carol is still gathering the needed contractor information and then will submit. **Update -** The contractors are not all NYSERDA and therefore we need more participants for the Heat Smart Program.

**Community Solar:** There are two applications in process. Emails are being sent as well as a physical mailing paid for by Solstice. There will be two information sessions at the end of the month – email going out from town. There is also a Solstice presentation at the Town Board meeting July 18.

**NYSERDA Contractors –** there was much discussion on the list of approved NYSERDA contractors, any first-hand experience with any contractors and how to get this knowledge out to residents to help make informed decisions.

**EV Scoping Document:** Tim will work on a draft and send around via email.

**Next meeting:** September 12, 5:30 at Town Hall.
