

**PIN # 8762.70, COUNTY ROUTE 7  
CULVERT REPLACEMENT OVER  
TRIBUTARY TO ROELIFF JANSEN  
KILL**

**Town of Gallatin, Columbia County**

**PUBLIC INFORMATIONAL MEETING**

The purpose of this Public Informational Meeting is to provide Columbia County officials an opportunity to inform the public of this project and to solicit input. At the present time, Columbia County is conducting preliminary design studies and would like to gather information from the community early in the design process.

Representatives from Columbia County and the Consultant working on this project will be available at this meeting to provide information on the project and address any issues and/or concerns. All comments will be considered during design development.

***Written comments should be transmitted to:***

Identification Number (PIN) 8762.70*

**PROJECT BACKGROUND**

This locally administered Bridge NY transportation project was initiated by the Columbia County Department of Public Works to address the declining structural integrity of the County Route 7 Culvert over the Tributary to the Roeliff Jansen Kill.

Engineering consultant, Greenman-Pedersen, Inc. (GPI) was selected by the county to perform the required Engineering, Environmental studies, and Design tasks to meet the project objectives.

**PROJECT OBJECTIVES**

- Replacement of the structurally deficient culvert with a new structure that will provide a minimum service life of 75 years;
- Address localized drainage, erosion, and culvert scour issues;
- Provide a structure that blends with the character of the surrounding community.

**PROJECT IMPROVEMENTS**

Preliminary plans showing the proposed culvert replacement alternatives that are being considered will be provided at the meeting for public view.

These plans do not show all proposed improvements that may be required but are intended to assist in obtaining public input.

The following alternatives will be presented:

- Alt 1* – No-Build (Null Option)
- Alt 2* – Culvert Rehabilitation
- Alt 3a* – Culvert Replacement with a Three Sided Rigid Frame (Concrete) Bridge
- Alt 3b* – Culvert Replacement with Concrete Integral Abutments and Steel Girder Bridge

Once a preferred alternative is selected by the county and design approval is granted by NYSDOT, final design will commence.

**TRAFFIC CONTROL DURING CONSTRUCTION**

The bridge will need to be closed to all vehicular, pedestrian, and bicycle traffic during construction. County Route 11 and State Route 82 are proposed to be used as a detour.

**PROJECT FUNDING**

The total construction cost for this project is currently programmed at \$1,620,000.

This project is being jointly funded by the State of New York's Bridge NY program, and by participating funds from Columbia County.

**ENVIRONMENTAL COMPLIANCE**

Environmental review of this project is currently being conducted. This project is anticipated to be classified as a SEQR Type II in accordance with 6 NYCRR Section 617.5.

**PROJECT SCHEDULE**

- Draft Design Report – July 2023
- Public Information Meeting – July 2023
- Final Design Report – August 2023
- Design Approval – September 2023
- Final Plans – January 2024
- Bidding – March 2024
- Construction – April to September 2024

**PRESENTERS**

Raymond Jurkowski, Commissioner of Public Works, Columbia County D.P.W.

And

Project Consultant  
Caroline Best, E.I.T., Project Manager  
Greenman-Pedersen, Inc.

Daniel Thomas, P.E., Senior Engineer  
Greenman-Pedersen, Inc.
